DETAILED ACTION

1. In response to the Preliminary Amendment filed on September 7, 2004, claims 1-19 have been cancelled, and the newly added claims 20-52 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 20-47, drawn to the diabetes self-care system and method, classified in class 434, subclass 262.
 - II. Claims 48-52, drawn to the apparatus for interactively monitoring a physiological condition and for interactively providing health-related information and method, classified in class 705, subclass 3.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are prima facie independent and distinct inventions due to their recitations of distinct and specific structures. Invention I is directed to the structural elements of the diabetes self-care system and method. Invention II is directed to the structural elements of the apparatus for interactively monitoring a physiological condition and for interactively providing health-related information and method. Because these inventions are distinct for the reasons given above and has acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3713

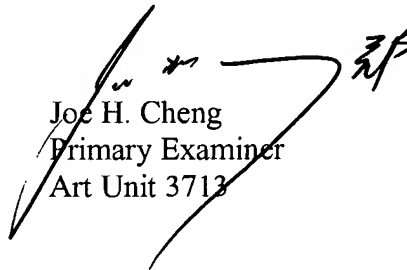

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
